AGENDA

- Quick shop overview & our approach
 - Key insights from 2023 transactional data
 - Clear, actionable recommendations
 - Next steps to keep momentum
-
-

INTRODUCTION

- **Bright Coffee Shop Sales dataset captures daily transactions across products within 3 stores.**
- **New CEO appointed with a mission to grow revenue and improve product performance.**
- **Actionable insights from historical sales data.**
- **Goal: provide a decision-support presentation for strategic growth.**

BACKGROUND

- **Coffee industry is highly competitive, requiring data-driven strategies.**
- **Historical sales data offers visibility into customer preferences and product trends.**
- **Revenue growth depends on identifying high-performing products and areas for improvement.**
- **Insights will guide CEO in strategic planning, marketing, and operations.**

Revenue per month

RECOMMENDATIONS

- **Focus marketing and promotions on Saturday, which shows the lowest revenue.**
 - **Reinforce strategies on Monday and Friday, as they are peak revenue days.**
 - **Low-performing categories (e.g., Branded, Loose Tea, Packaged Chocolate) may need rebranding, bundling, or discontinuation**
 - **Lower Manhattan lags behind; investigate causes (location, customer base, product mix)**
